Dear Ms. Powis:

The EPA Region 6 has received your March 1st, 2024, Petition, requesting EPA to withdraw the Texas Class II Underground Injection Control program. Your petition raises substantial concerns regarding the sufficiency of Texas' implementation of the UIC Class II program that the EPA Region 6 will need to evaluate through extensive and thorough technical and legal review in order to evaluate the issues raised in your petition. Thank you for your interest in protecting ground and drinking water in Texas and we will be sure to keep you updated on our review.

Sincerely,
